

J-Series Collection

The J Series collection creates design unity across the entire work environment from executive workspaces to meeting rooms, boardrooms, break out spaces and kitchen/café areas.

J Series is a table and leaner system designed to work in both formal meeting rooms and more casual break out spaces. The system may be customised - offering a multitude of options from desks, meeting tables, boardroom tables, cafe tables, bar leaners and more.

The J Series is stylish and practical, with the strength of the design underpinned by the diagonal bracing and by the strong 50mm tubular

frame which is available in range of powdercoat colours or stainless steel.

Standard table top finishes are laminate and veneer, although glass, marble, stone and solid surface material also work well.

The range is manufactured locally in Auckland and may be customised to suit all individual requirements including on-desk power and data solutions, screens for hot-desking and even concealed power and data for retail spaces.

A Place To Meet. A Place To Eat. A Place To Work. A Place To Collaborate.

The J Series table system has been expanded into a workstation system which offers an elegant and boutique solution for modern office spaces. The J Series is available as stand-alone desks, L-shaped desks (linear desk with return) and pods of 2, 4 and 6 workstations.

Standard worktop sizes are 1600 x 800 and 1800 x 800 for pods of 2, 4 and 6 workstations. A negative space allows for easy cable access. Desks may be fitted with wire cable baskets and are available with self-levelling adjustable feet.

Other cable management accessories include executive power/data boxes, on desk power and USB chargers, wire cable baskets, CPU holders, umbilical's etc.

Desks are complemented by an array of storage solutions accessories including mobile pedestals and storage cabinets.
