- Lacquered structure.
- Top in HPL, Melamine o Fenix.

Measures

The Puck table features a lacquered steel frame available in any of the colours from our range, and a countertop which is available in different finishes. Thanks to the layout of its structure, this auxiliary table perfectly matches the poufs from the Puck collection as well as seats from other collections in our catalogue, and can be placed either in front of the seat or to the side. This is the ideal choice for corporate areas and domestic environments.
