Moulin Lounge

Pierre Paulin | Design 1958 - Introduction by Artifort 2023

Design

From the Orange Slice® to the Ribbon®, the iconic armchairs created by renowned designer Pierre Paulin are now part of our collective subconscious. His original approach to techniques and aesthetics has firmly established him among the makers of international design history.

The 1958 Moulin chair family were some of his first commercial pieces exploring Mid-Century Modern aesthetics. This year, Artifort is enriching the Moulin chair family with the introduction of model CM190: Moulin Lounge.

Moulin Lounge is an elegantly minimalist armchair combined with modern comfort. It is recognisable by its slender steel frame connecting the shell of the seat, the backrest and the optional armrests. The upholstered parts have an organic shape reminiscent of a wave, with a curved seat, backrest and armrests that flow seamlessly into each other. The armchair has four slim metal legs and is available in many colours.

In addition to its aesthetic qualities, Moulin Lounge is comfortable and functional. The curved shape of the seat and backrest provide excellent support for the body, and the armrests offer additional comfort. Because it comes with slim legs, the armchair is light and easy to move.

Productdetails Moulin Lounge

- Reintroducing Pierre Paulin's 1958 Mid-Century Modern design classic CM190.
- Moulin Lounge is an elegantly minimalist armchair combined with modern comfort.
- Its curved steel frame connecting the seat, back and optional armrests to the slender chair legs make it instantly recognisable.
- The upholstered parts have an organic shape reminiscent of a wave, with a curved seat, backrest and armrests that flow seamlessly into each other.
- Available in two versions: Moulin Lounge and Moulin Lounge with armrests.
- Can be upholstered in a wide range of fabrics and leather.
- The base comes with a powder coating finish (either glossy or matt effect).
- Available with a matching footstool.
- Moulin Lounge complements the rest of Pierre Paulin's chair family.

Design 1958 - Introduction by Artifort 2023

About designer Pierre Paulin

Pierre Paulin (1927) made a considerable impression with a contemporary shell fauteuil, at an international furniture show organised by Kho Liang le. Shortly after the show, he became a freelance designer for Artifort. This marked the beginning of a long and fruitful collaboration. What makes his designs so distinctive is their striking sculptural shape, which earned Paulin many prizes worldwide. His work remains timeless and progressive even today. This is not form for form's sake but applied design. With comfort as the constant starting-point. Artifort still includes many of Paulin's designs dating from the nineteen-sixties and seventies in its permanent collection. His work can be admired in museums throughout the world. Apart from furniture, he also designed interiors for the French presidents Pompidou and Mitterrand in the Elysée Palace in Paris. In November 2009, Paulin was posthumously awarded the distinction of "Royal Designer for Industry" (RDI).

About Artifort

Artifort has been producing distinguished, comfortable, and functional furniture since 1890. The foundations of Artifort were laid by classic icons created by designers such as Kho Liang Ie, Pierre Paulin, and Geoffrey D. Harcourt RDI. The current generation of renowned top designers such as Monica Förster, Khodi Feiz, Patrick Norguet and Luca Nichetto are continuing the Artifort DNA. The Artifort collection is characterized by innovative, colourful, and timeless design with a recognizable shape. Through craftsmanship and high-tech production techniques, Artifort produces lasting high-quality furniture for this generation and those that follow.
