

IRON TABLE

enea

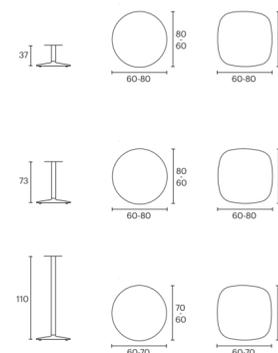

BY Estudi Manel Molina

Structures

- Steel base
- Ø50×2 mm round cold rolled steel tube
- Circular or rounded-square top with straight or bevelled edges, available in melamine, HPL, Fenix or oak

Measures

Iron table has a steel structure lacquered in any of our colours that provides absolute stability. Having variable heights, different finishes and table top shapes, it is perfect for cafes, bars, restaurants and hotels, though it is also adequate for more corporate environments.
