

Waste management

UFL is an industry leader in the manufacture and supply of a wide selection of landside and airside products including mass seating, counters, passenger facilitation, hospitality, lounge and complementary furniture.

We manufacture using high-performance materials, featuring ergonomic design for superior passenger comfort and space economy. To deliver the optimum passenger experience we tap into global trends, new materials and innovative technology, to meet your needs through innovative products, advice and customisation.

UFL has a commitment to quality and sustainability in both design and manufacture. We hold ISO 9001 certification.

Wherever possible, we consider each product's lifecycle, choosing materials and components which can be reused and recycled. We're also consciously working to reduce our carbon footprint and impact on the planet.

UFL is a proud member of ACI Airports Council International.

Striving to be sustainable is that much easier with our collection of waste management containers. Manufactured from brushed stainless steel, these rubbish bins aim to maintain a clean and sophisticated space.

Designed for style and functionality, the UFL rubbish bin collection aims to keep your space looking clean and tidy.

From general purpose bins with ashtray receptacle to eco-friendly bins that help to sort trash and recycling, this collection can help support your waste management objectives.

UFL Airports rubbish bins assist with maintaining the social environment and reaching sustainability goals.

Features

Putting an environmental spin on the bin

When things become rubbish

Encouraging passengers to dispose of rubbish appropriately allows everyone to enjoy the public space at all times.

Convenient rubbish collection

Bins have a removable lid that makes changing rubbish bags fast.

Being sustainable

Allocating specific disposals for each type of trash can help to achieve sustainability targets. Pre-sorting trash can potentially be a cost-savings to your business as well as meeting environmental regulations.
