
NATURAL WOOD MEANS NATURAL LIGHT

Timberlite™

The mark of
responsible forestry

Wood is a noble material and has been part of our DNA since our beginnings. All LZF lamps are handmade from FSC natural wood veneer, ensuring their origin from controlled forests and guaranteeing our sustainability and environmental commitment. LZF lamps' wood veneers are treated with a technique patented by LZF, called Timberlite®, that allows this fragile material to become flexible and resistant without the need of any chemical processes. Knots and other elements of wood are a natural occurrence and form part of the feel and design of the material. As a living material our veneers will age with time, changing as you change, accompanying you with their richness during a whole lifetime.

WOOD SHADE FINISHES

The effect of light passing through the wood veneer is the essence and hallmark of LZF. This important feature would not be possible without the application of our patented process in treating the raw natural veneer:

The Timberlite® system.

This system, allows us to work with an extremely flexible, yet very resistant veneer, which can take on many shapes without breaking. Lastly, all our veneers are FSC certified.
