

TABLET SOFA

by Ramón Esteve

The TABLET collection, designed by Ramon Esteve links new technologies and flexibility to the versatility of a sectional composition, creating a program based on the duality, identity and integration. Its character blends with the space and adapts itself to it.

This versatility can be seen due to the collection's capacity to adapt to different surroundings, creating a reticular composition derived from the sectional's juxtaposition where the compositing freedom is the main goal. The upholstery, made of independent sections, allows you to create different shapes, which always keep visual consistency.

The collection's construction, based on polyurethane foam with a metallic structure upholstered with polypropylene fabric, makes TABLET a perfect collection both for indoor and outdoor spaces, thanks to its sophisticated aesthetic and finishing.
