

TRAY CHAIR

enea

BY Estudi Manel Molina

Tray chair, a perfect family for educational environments and communal areas, comes with the complete range of finishes of Lottus collection. The structure is made of metal, and the writing table and tray are seamlessly integrated to suit individual needs. Tray chair combines a shell on a structure with castors, a tray and a folding writing table, so it is so useful for responding to the requirements of learning and multi-purpose spaces. The shell has a broad range of finishes available: wooden shell, polypropylene shell with or without polypropylene or upholstered seat pad, or fully upholstered one. Furthermore, the backrest and the writing table can be produced in two dimensions.
